## MODEL KIT

These R/C cars were designed and built for novice, intermediate and advanced modelers. They look as realistic as they perform, and are the perfect vehicles to get one started in the world of radio control racing. Powered by powerful electric motors, they can be run without noise or pollution. Tamiya's genuine spare and optional parts are available for maintenance and tune-up.

## R/C EQUIPMENT

Separately sold R/C system and a Ni-Cd 7.2V battery are required for operating the R/C models, and are also available from Tamiya (not available in some countries). Use only officially designated radio frequencies for the radio control of models. Select a compatible charger when charging a Ni-Cd battery. Consult with your local Tamiya dealer or any good model hobby shop.

## BODY PARTS

The body shell is the most liable to be damaged in the event of collision. In such cases, Tamiya offers a wide range of R/C car body parts sets which are highly realistic and true to scale. Replacement of body also contributes to giving your model an entirely different and refreshed appearance. Select a body that fits your car's chassis dimensions (track, wheelbase, wheel size etc.).

## SPARE PARTS

To keep your R/C model in optimum condition, daily maintenance and repairs are essential. Even though Tamiya's models are designed to have enough durability for normal usage, some components are liable to wear. Periodically check and replace damaged and/or worn components. Tamiya's spare parts will turn routine maintenance chores into an integral part of R/C enjoyment.
