STOCK MOTORS

#0004 "Dirt Oval Stock"

This radical stock motor was designed to run in both 2 and 4wd off-road cars. The design philosophy behind the Speedworks stock motors was to produce a high horsepower motor with a long life span and this motor fits the bill. This motor runs well in both oval and off-road racing.

Specs:

Magnets: High density Speedworks ceramic
Ball Bearings: No, precision oilite bushings
Adjustable timing: No, preset at factory, 7 degrees
Wind and turns: 25 turn single
Rpm's: 24,100
Recommended cars: All 2 and 4wd off-road cars, RC10, Jrx2, Cat xls etc.
Recommended batteries: Trinity RC# 5033/5034 Matched SCR battery packs or 1300 mAh sport pack #0011
Price: \$25.00

#0005 "Super Speedway Stock"

The banks of the legendary Lake Whippoorwill Super Speedway were the development grounds for this outrageous stock motor. If you run on the high banks or just on-road racing this is the stock motor for you! Designed for outstanding performance with 1/10th on-road cars. N.A.R.A. legal!

Specs:

Magnets: High density Speedworks ceramic
Ball Bearings: No, precision oilite bushings
Adjustable timing: No, preset at factory, 8 degrees
Wind and turns: 25 turn single
Rpm's: 24,200
Recommended cars: All on-road cars, 10L, Agitator, Lynx etc.
Recommended batteries: Trinity RC# 5033/5034 Matched SCR battery packs or 1300 mAh sport pack #0011
Price: \$25.00

#0444 "Joel "Magic" Johnson® Signature"

Now there is a ROAR legal stock motor in the Speedworks line. The Joel "Magic" Johnson® model was designed to compete in the races that require a ROAR legal motor. If this is your game then this is the fastest motor in town. Comes complete with brush and endbell heatsinks and Speedworks dual shunted "Speed Brushes™".

Specs:

Magnets: 2 Stage™ Wet magnets 3.0
Ball Bearings: No, precision oilite bushings
Adjustable timing: No, preset at factory, 34 degrees
Wind and turns: 27 turn single
Rpm's: 25,000
Recommended cars: All on and off-road cars, RC10, 10L, 12L, Cat xls, etc.
Recommended batteries: Trinity RC# 5044/5045 Matched SCE or RC# 5033/5034 Matched SCR battery packs or 1300 mAh sport pack #0011
Price: \$28.00

MODIFIED MOTORS

#0001 "Buggy Master™"

The "Buggy Master™" is a machine wound all purpose off-road motor. This makes excellent starter modified as it was designed to be easy on gearboxes (which makes it perfect for entry level cars) and provide modified performance with out excessive battery drain. This motor works excellent with SCR Battery packs.

Specs:

Magnets: High density Speedworks ceramic
Ball Bearings: No, precision oilite bushings
Adjustable timing: No, preset at factory
Wind and turns: 20 turn single
Rpm's: 30,000
Recommended cars: All on and off-road cars, 10L, Pro10, RC10, Jrx2, Optima Mid etc.
Recommended battery: Trinity RC# 5050 SCR & #0011 1300 mAh sport packs
Price: \$29.99

ELECTRICAL STUFF

#0419 "Fuse Holder"

Super heavy duty, wired fuse holder for electronic speed controllers. Allows you to change fuses without soldering. ...\$3.99

#0432 "Long Range Antenna"

or Hyper drive equipped cars
Recommended batteries: Trinity RC# 5044/
5045 Matched SCE or RC# 5033/5034 Matched
SCR battery packs
Price: \$39.99

#0012 "Road Beast™"

Whether you are looking for a slightly hotter, ball bearing, version of the "Buggy Master", need a motor for a zero bite off-road track, want a modified to run with your SCR high output cells or need an 8 minute on-road 6 cell motor this is the answer. The "Road Beast" was designed to be super efficient and extra easy on batteries. This makes it excellent for longer races or for use with SCR battery packs. Run this motor with a big pinion gear and get lots of top speed with good battery life.

Specs:

Magnets: 2 Stage™ Wet magnets 2.0
Ball Bearings: Dual ball bearings
Adjustable timing: Yes
Wind and turns: 20 turn triple
Rpms: 33,000
Recommended cars: 12L, Pro12, Corally,
Agitator 12, Road Wizard, RC10, Jrx2 etc.
Recommended batteries: Trinity RC# 5033/
5034 Matched SCR battery packs
Price: \$39.99

#0555 "Tony Neisinger Signature™"

The fastest of the fast, the "Neisinger Signature" is a quad wind motor that was designed for big fast horsepower tracks. To run this motor you need to have your chassis really hooked up to take advantage of the outstanding power. This is definitely not the motor for beginners, only the experienced need apply!

Specs:

Magnets: 2 Stage™ Wet magnets 4.0
Ball Bearings: Dual ball bearings
Adjustable timing: Yes
Wind and turns: 14 turn quad
Rpms: 40,000
Recommended cars: 4wd cars, Dominator, Cat
x1s, Yz10, Mid Optima etc.
Recommended batteries: Trinity RC# 5044/
5045 Matched SCE battery packs
Price: \$39.99

MOTOR STUFF

#0430 "Speed Brush™"

Dual shunted soft compound motor brush. Produces high RPM's. Replacement brush for #0444. ..\$3.00

BATTERIES

#0011 "Sport Battery Pack"

6 cell assembled Sanyo 1300 mAh battery pack with Tamiya style connectors. ...\$32.00

BATTERY STUFF

#0013 "Battery Pack Building Kit"

All the necessary ingredients to assemble your loose cells into a battery pack. Comes with battery washers, plug, wire battery braid, shrink wrap and detailed instructions. ...\$3.50

#0014 "Dropping Resistors"

Two 30 ohm resistors pre-wired with alligator clips. Attach to your battery pack after running to slowly discharge your battery pack. ...\$3.50

#0002 "427 - 4 wheel drive"

Low end torque and high RPM's are the the required specs for a 4wd motor, and this is exactly what you get with the "427". This motor was designed to overcome the power robbing transmissions in 4wd off-road cars. This motor is a perfect match with Trinity "Matched SCE Battery Packs" (RC# 5043 4 cell, RC# 5044 6 cell, RC# 5045 7 cell).

Specs:

Magnets: 2 Stage™ Wet magnets 2.0
Ball Bearings: Dual ball bearings
Adjustable timing: Yes
Wind and turns: 16 turn double
Rpm's: 36,000
Recommended cars: All 4wd off-road cars, Yz10, Cat xls, Mid, Dominator etc.
Recommended batteries: Trinity RC# 5044/5045 Matched SCE battery packs
Price: \$39.99

#0003 "350 - 2 wheel drive"

The "350" was designed with the same specifications as our "427", but has a specially wound armature which produces a smooth power band, an essential ingredient in a 2wd motor. This motor offers outstanding top speed, but a smooth power curve, to all but eliminate any wheel spin coming off the corners.

Specs:

Magnets: 2 Stage™ Wet magnets 2.0
Ball Bearings: Dual ball bearings
Adjustable timing: Yes
Wind and turns: 18 turn double
Rpm's: 34,000
Recommended cars: All 2wd cars, RC10, Jrx2, Top Cat, Ultima etc.
Recommended batteries: Trinity RC# 5044/5045 Matched SCE or RC# 5033/5034 Matched SCR battery packs
Price: \$39.99

#0007 "Pole Position"

"Pole Position" is the second hottest of the Speedworks modified motors. This motor is a killer in either an on-road car or 4wd off-road racer. This motor produces lots of top end with a driveable torque range.

Specs:

Magnets: 2 Stage™ Wet magnets 2.0
Ball Bearings: Dual ball bearings
Adjustable timing: Yes

Wind and turns: 15 turn double
Rpm's: 37,000
Recommended cars: All cars, Pro10, 10L, Predator, Agitator Cat xls, Mid etc.
Recommended batteries: Trinity RC# 5044/5045 Matched SCE battery packs
Price: \$39.99

#0008 "Monster Mash!™"

With Monster Trucks and truck pulling becoming more popular we decided to release the ultimate Monster Truck motor. The "Monster Mash!" was put together with a single wind armature to produce lots of stump pulling torque while still having a lot of top speed. This motor is awesome in any of the RC Monster Trucks on the market today. When used with "Mash2" you have a pair of the fastest, most powerful motors you can buy for todays generation of dual motored Monster Trucks. So if you want car crushing "State of the Art" this is it!

Specs:

Magnets: 2 Stage™ Wet magnets 2.0
Ball Bearings: Dual ball bearings
Adjustable timing: Yes
Wind and turns: 16 turn single
Rpm's: 36,200
Recommended cars: Clodbuster, Double Dare, Blackfoot, Midnite Pumpkin
Recommended batteries: Trinity RC# 5044/5045 Matched SCE or RC# 5033/5034 Matched SCR battery packs
Price: \$39.99

#0009 "Monster Mash2™"

The "Mash2" has the same specs as #0008 but turns the opposite direction. This motor can be used along with #0008 in any of the new breed of twin motored monster trucks. This modified is also the answer if you wish to run the Hyperdrive belt setup in right hand drive cars.

Specs:

Magnets: 2 Stage™ Wet magnets 2.0
Ball Bearings: Dual ball bearings
Adjustable timing: Yes, reverse rotation
Wind and turns: 16 turn single
Rpm's: 36,200
Recommended cars: Clodbuster, Double Dare,
